

6516206353.txt

As a subscriber to satellite radio I enjoy programming variety unavailable in my own home area and while travelling. I especially have been using XM traffic and weather reports to plan routes and travel timing on trips to Boston and through NY, Phila., and Washington, DC. The 24 hour convenience of these services is unavailable in such a fashion through any other convenient communication service. I pay for this specific service and I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM satellites radio's ability to provide the kind of information programming that I demand and deserve.

Thank you,

Roger Fenn
